Using Viessmann Vitopure air purifier in the bedroom

The new Viessmann Vitopure air purifiers can meet the growing demand for healthy indoor air. Three types of these units are available, with purification capacities of 250, 350 and 450 m<sup>3</sup>/h. Simply plug the air purifier into an outlet and it is immediately ready for use.

#### **Against pollen, dust, viruses, and bacteria**

More than 99.95 % of all pollutants from air are captured by the HEPA filter used in the device and an activated carbon filter. The spread of dust and house dust, pollen, bacteria and is virtually completely inhibited.

#### **Stay healthy and sleep better**

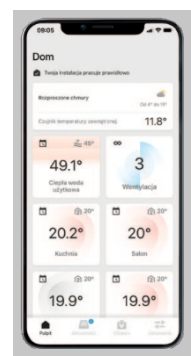

Cleaner air not only has a positive effect on health but also improves the quality of sleep. Filter with activated carbon absorbs volatile organic compounds (VOCs, VOCs). A colored LED ring on the control panel indicates the current air quality and reminds you when to change the filters.

#### **Convenient control via the Viessmann One Base platform**

Vitopure is controlled via the free ViCare App for smartphones, which is a top-rated application among similar applications. The device can operate in manual mode with a defined degree efficiency, as well as in automatic mode during which it analyzes the quality of air in the and smoothly adjusts the ventilation rate. In addition, users can program their own time profiles. At specific time intervals, Vitopure can operate at minimum or maximum efficiency - for example, in the evening, at , or for quick air purification before the occupants return home.

**VISSMANN  
ONE BASE**

The operation of the purifier can be controlled remotely via the ViCare mobile application
